

Investment Opportunity: Manufacturing Ozondjeno Charcoal Broiler

Charcoal cooking is an emerging food trend across the world due to the flavour that the smoke imparts, and as it has gained popularity, demand has surged.

The industry has grown rapidly from 50,000 tons per annum in 2014 to 120,000 tons per annum in 2015. Namibia is a large and well established charcoal exporter to South Africa, Europe and the Middle East.

It has an abundance of wood which is suitable for conversion to charcoal, and various enterprises have been established to meet demand. Collection of wood also has the benefit of reducing invader bush and improving land for farming.

Project Overview

Ozondjeno seeks to expand and develop the existing charcoal manufacturing operations into

a modern processing plant to produce charcoal on a larger scale. The company currently exports about 400 tons of bulk charcoal to South Africa. The project plans to increase the output to 6,000 ton per annum. Through expansion of the project, the company wishes to diversify its export market to other international markets. After expansion, Ozondjeno expect to have 5% share of the Namibian charcoal production industry.

Project Timeline
